PROFESSIONAL EXPERIENCE

Rutgers, the State University of New Jersey - New Brunswick **New Brunswick, NJ, USA**
Building Operational Manager *September 2021 - May 2024*

- Increased team efficiency by 20% by optimizing work processes through data-driven decisions and strategically delegating tasks based on urgency and importance, ensuring 98% task completion.
- Influenced cross-functional guidance and mentorship to a 30+ person team, demonstrating exceptional leadership and problem-solving skills to cultivate a positive and motivated work environment with a focus on decision-making.
- Developed a robust event execution framework that supported 20+ concurrent events, leading to a customer satisfaction rating of 95% by emphasizing precise scheduling and effective resource management across teams.
- Created a standardized protocol for using Microsoft Teams that improved cross-departmental collaboration; facilitating seamless event planning and enhancing team morale.

Blueprint **New Brunswick, NJ, USA**
Product Management Fellowship *January 2023 - April 2023*

- Attained a 20% reduction in feature development time through a user-centric approach to analyzing user requirements, collaborating with a team to translate research into actionable user stories and innovative solutions.
- Acquired a 90% on-time feature delivery rate by developing detailed project plans, crafting a product roadmap, prioritizing features, and setting development timelines to drive strategic planning.
- Positioned the product to capture a projected market share of 10% by analyzing target market and competitor offerings, gaining insights into user needs, market trends, and competitive advantages.
- Elevated project success by 30% by applying business analysis techniques and risk management strategies to guide product decisions while ensuring compliance with industry standards.

PROJECTS & OUTSIDE EXPERIENCE

Auction

- Enabled secure and transparent bidding by developing a web auction platform using SQL and HTML, incorporating efficient algorithms to track highest bids.
- Engineered a core e-commerce platform with integrated bidding, auctions, and user management features, enhancing overall user satisfaction and operational workflow.
- Demonstrated expertise in database management by developing a secure database architecture for user accounts and auction listings, ensuring data integrity and security.

Chess

- Enriched user engagement by building a cross-platform chess app using Java and HTML, ensuring accessibility on Android devices and complying with accessibility standards.
- Boosted seamless multiplayer functionality within the chess app, facilitating interactive gameplay and strategic thinking, allowing players to engage in strategic battles against friends or against AI opponents, enriching the gaming experience.

Photo Library

- Incorporated Java to port a JavaFX photo management project to Android, enhancing features and optimizing performance to achieve a seamless mobile experience for users.
- Improved app usability by creating a high-performance home screen that integrated tag-search functionality for rapid album and photo data retrieval.
- Strengthened project collaboration and code tracking by leveraging Git for version control and Bitbucket for repository management.
